

A COMENIUS PROJECT

TIMELINE and PURPOSE

The project was initiated autumn 2011 and aims both to see how cyberspace has become a natural part of our society and what cyberspace can bring in the future. Each participating country have hosted meetings where both students and teachers/administrative personnel have attended. The final meeting was held in June 2013.

RESEARCH and DEVELOPMENT

During the project, a multitude of tasks have been performed by the students. This has included questionnaires, presentations involving cyberspace in practice, development of the project webpage and other tasks that have been presented during the meetings.

KNOWLEDGE and EDUCATION

Through visits to relevant businesses and institutions, all of the participants have gotten first hand information on how cyberspace has become an important part of science, telecommunication, teaching institution and every day life.

FUNDED BY

Education and Culture DG

Lifelong Learning Programme

CULTURAL EXCHANGE

Students from the participating countries have gotten glimpses of the variety of history, culture and customs that you can find throughout Europe. Students have seen first hand how schools in other countries are organized. Personal contacts and friendships have been formed, outlasting the project.
